

# Identity Security in Organization

## Workshop highlights

Get a rating of your identity security posture and see how it compares to your peers

Gain insights into apps used in your environment - even ones unsanctioned by IT

Understand how to prevent identities from being compromised

Learn how to reduce costs and improve business agility and security with simplified app access

“Identity and threat protection are high on customers’ minds. Getting identity right is a critical part of a Microsoft 365 project and is the first place we start. ”

**-Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study**

Are you aware of suspicious user and sign-in behavior in your environment? Are you threatened by ongoing suspicious requests?

## Protect user identities

Identity is today’s control plane for digital transformation. Organizational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralized behind traditional network security.

With identity attacks on the rise, this workshop will show you how to stop tomorrow’s data breaches by securing identities today.

We will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture.

### Optimize identity

Identify potential risks related to identity and see opportunities for improvement.

### Assess security posture

Receive a numerical rating of your identity security posture and see how it compares to similar organizations.

### Reduce costs

Minimize expenses associated with password reset and helpdesk resources.

### Increase visibility

Get a sample survey of apps your employees are using and if IT supports them or not.

We'll work with you to:

- Understand your identity goals and objectives
- Define your existing and desired identity security posture
- Provide insights into applications used within your environment (sanctioned and unsanctioned by IT)
- Showcase core IT and user security scenarios through demos
- Develop a joint action plan based key results, recommendations and next steps

## We'll customize the workshop based on your organization's needs

Design  
and  
Planning

Customer  
value  
conversation

Discovery  
Session for  
Identity

Key results,  
recommendations  
and next steps

Demos
